Twenty Year Galvanised Steel Frame Guarantee

STREETSKAPE ORIGINAL SKATEPARKS MAINTENANCE /INSPECTIONSCHEDULE

Our Aim is to install skate parks that will be a source of trouble free pleasure for many years. To achieve this, we pay close attention to the design, quality of the materials, manufacturing processes and installation methods employed in the construction of your skate park in order to minimise maintenance requirements. For optimum ongoing enjoyment of your skate park we recommend that the following routine is observed:

Weekly Inspection

1. Keep all skating surfaces clean and free from dirt.
2. Check riding surface fixings and replace any loose fixings with stainless steel rivets supplied
3. Check all steel transitions remain flush with asphalt surface.
4. Ensure all ground fixing bolts are secure and there is no movement in the equipment.
5. Keep the asphalt area round equipment clean as this will increase the life of the riding surface on the ramps.
6. Maintain a documented record of inspection and maintenance.

All spare parts and most surfacing are available from stock.

Remember we are happy to enter into an annual maintenance contract if required.

Please contact Streetskape Limited on 01603 714040 or send an email on sales@streetskape.com to arrange this or for any spare parts required
